Hanson Agrochemical Consulting is a subsidiary of the Hanson Industry Company and located in Ottawa, Ontario, Canada. Hanson currently has seven staff members, four of whom are responsible for product registration and three for pesticide sales.

Founded in 2014, the mission of Hanson Agrochemical Consulting is to provide customers with quality services on the innovation, registration, promotion, and market penetration of agrochemical products, thus bridging the product suppliers to the end-users. Our vision is to equip the farmers in North America with an alternative, competitive, feasible, and affordable crop protection tool, such as generic herbicides and fungicides, to tackle crop protection issues, with the aim to boom and robust agricultural industries.

Connecting Generic Products to Farmers’ Needs in North America

## ABOUT OUR SERVICES

Hanson's business covers agrochemical (pesticides and fertilizers) product registration, agrochemical product sales, agrochemical & GM crop market consulting, new pesticide compounds acquisitions, pesticide news, interviews, and global crop biotechnology patent watch etc.

### PRODUCT REGISTRATIONS

At present, more than 30 product registrations have been submitted, and 8 product registrations, including glyphosate, glufosinate, s-metolachlor, boscalid, florasulam and clomazone, have been approved at PMRA.

### PRODUCT SALES

Hanson has established a good strategic partnership with major distributors in Canada. Hanson has mastered many terminal farmer customers and is practicing a new concept from ports to farms and paving the way for a smooth and sustainable entry into the end-user market.

### CONSULTING

Hanson has published 12 pesticide market and registration reports, including the key markets such as USA, Canada, China, Vietnam, Thailand, Philippines. Hanson has been an invited speaker in various international pesticide conferences.

- ✓

s-metolachlor technical

# Flexible Solutions for Your Business Needs

Hanson Agrochemical Consulting Provides You a Total End to End Solution

## REGISTRATION SOLUTIONS

Hanson Agrochemical Consulting has been widely recognized and highly praised by the industry for its customer-first, good-faith, cost savings, and fast track registrations. Hanson Agrochemical Consulting is very proficient in the operational procedures for pesticide registration at PMRA, especially for data compensations.

## MARKETING PENETRATION SOLUTIONS

Hanson sells both technical and formulations of glyphosate, glufosinate, s-metolachlor, boscalid, florasulam and bentazone. We can source the prothioconazole, clethodim, flucarbazone, tebuconazole, and metalaxyl for customers from Asian countries.

## MARKET DATA DRIVEN SOLUTIONS

Hanson can collect the custom data and analyze pesticide exports by target countries, active ingredients, values, and manufacturers or exporters. Hanson has been conducting a comprehensive pesticide market survey for Phillips McDougall and others for years.
